DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1,2,4-11,15,17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant claims are to a "pharmaceutical composition of Nimesulide". However, in the specification on page 12-22 Applicant provides Examples of pharmaceutical tablets of Nimesulide. Applicant provides examples in the specification for making and using the tablet, which is a species of the composition genus. However, Applicant does not provide Examples of how to make other composition forms (e.g. granules, pellets, capsules, etc.) of Nimesulide. One having ordinary skill in the art would have to conduct several experiments in order to develop and use the other composition forms of Nimesulide.

Claims 4,15,17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant claims are to a pharmaceutical

composition of Nimesulide comprising "methacrylic acid derivatives". The specification does not provide any examples of "methacrylic acid derivatives". One having ordinary skill in the art would have to conduct several experiments in order to determine which "methacrylic acid derivatives" to employ in instant invention.

Claims 1,2,4-11,15,17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The term "fraction" in the claims is new matter. The term "layer" is used in Nimesulide containing tablets of the instant inventions. See Examples on pages 14-22 of instant specification. Examiner suggests that Applicant replace the term "fraction" by the term "layer".
